# colour palette

---

The main theme in **risr/**apply is composed of 3 different colours, each with 10 unique shades. These colours are then used to give semantic meaning to the various elements and page components in the application.

The default colours are designed to meet WCAG 2.1 contrast ratios at the AA level. Sufficient contrast is essential to make page elements distinguishable and easy to find.

At this time, customer cannot customise the colour palette for **risr/**apply.

## **risr/**apply default colour palette
